ENG. DEPT.

Mr. B. E. Kingsbury September 9, 1965

I don't know what you may have done in the way of putting together the final test report. You may be interested in these comments made after a last look at the Bethea report and some reflection on the M&E reports. You know that the first report mailed from Bethea never arrived. In fact, I think that they mailed several, only the last of which managed to make it to Boston.

It makes no difference to us if you have one combined report in three sections, three separate reports or possibly you could have three separate documents, each called a part of a combined report. The comments are made on the assumption that you will make one report and some might be phrased a little differently if three are considered.

General

Introductory page to RIV and Corona test report should be modified to recognize existence of mechanical test report and M&E test reports.

Mechanical Test Reports

1. Use format similar to that established for RIV and Corona tests.
